»CERES« je ime za pas asteroidov (»majhnih teles«) med Marsom in Jupitrom. / »CERES« is a name for a belt of asteroids (»small bodies«) between Mars and Jupiter.

ZVEZDE (ponavadi, ko in če so dovolj »fit«) svetijo in okoli njih krožijo planeti. Zvezde združujejo sončni sistem. / STARS (usually, if and when they're »fit« enough) shine and planets circulate around them. Stars unite a solar system.

PLANETI so dovolj veliki in stabilni, da se na njih lahko živi, in krožijo okoli zvezd. (Ne pozabite: planeti našega Osončja krožijo okoli Sonca.) / PLANETS are stable enough to live in them and they circulate around stars. (Don't forget: planets of our Solar system circulate around the Sun.)

SATELITI krožijo okoli planetov; s svojo prisotnostjo omogočajo planetom stabilnost in življenje na njih. / SATELLITES circulate around planets; their presence enables stability of planets and life in them.

ASTEROIDI so največkrat majhni in krožijo vsepovsod; za življenje na njih niso dovolj stabilni. / ASTEROIDS are usually small and they circulate all around; they aren't stable enough to live in them.

1 UVODNI DEL / INTRODUCTION PART

»Z ljubeznijo od Tiste/Tisti, ki je (bila) tako kot mama, pa mama ni. In od Tiste/Tisti, ki kot Sonce je (bila), čeprav Sonce ni. Ker Sonce je rumeno, ona pa je kot oranžno sonce za možgane.«
/

»With love from/to The One, who is (was) like mamma, but mamma she is not. And from/to The One, who is (was) like Sun, although she is not Sun. Because Sun is yellow, and she is like orange sun for brains.«
/

»Naj Te Ljubezen vodi, Popotnik skozi Čas in Prostor. Ker vse je z Ljubeznijo. Naj bo Ljubezen vsajena v vsako celico in v vsak tvoj delček, tako kot iskanje Resnice in naravne Lepote in Dobrega. Ljubezen-Prijateljstvo-Spoštovanje napram vsemu in vsakomur. In vse je živo in vsemu enakovredno.
/

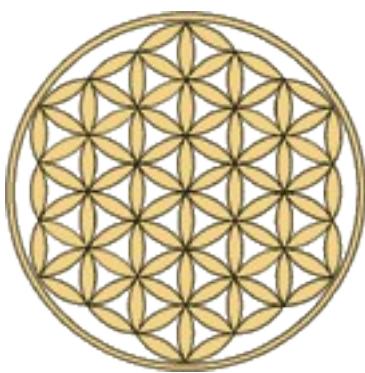

»Let Love leads you, Traveller through Time and Space. Because there is everything with Love. Let Love be implanted to every cell and bit of you, just like searching for the Truth and natural Beauty and Good. Love-Friendship-Respect towards everything and everyone. And everything is alive and equal to everything.«
/

»Imamo se radi, smo dobri, zdravi, prijazni, pogumni in pametni; izbiramo življenje, mišljenje, učenje, rast in se »fajn imeti« kot živa bitja, skupaj drug z drugim.«
/

»We like each other, we are good, healthy, kind, brave and wise, we choose to live, think, learn, grow and have fun as free living ones, together with each other.«
/

»Hvala, dobri Gospod-Stvarnik-Oblikovalec, za vse začimbe, ki si nam jih dal, da bi bili zdravi in srečni. In hvala, dobri Gospod-Stvarnik-Oblikovalec, za vse ljudi, ki niso popolnoma zlobni in/ali neumni, in ki verjamejo, da je raznovrstnost del največje modrosti, za katero si se odločil, da jo boš delil z vsem živim.«
/

»Thank you, good Lord-Creator-Designer, for all the spices you gave to us to be healthy and happy. And thank you, good Lord-Creator-Designer, for all people who aren't completely mean and/or stupid, and who believe diversity is part of the greatest wisdom which you decided to share with everything alive.«

VERJEMITE ALI PA NE / BELIEVE IT OR NOT

Če znaš leteti (sama tega na žalost oz. na srečo ne obvladam), lahko služiš denar tudi kot vohun – delaš lahko za vlade (»politični« vohun, vohun »hladne vojne« ali »psihološke vojne«), za industrijo (»industrijski« vohun), ali za »navadne« ljudi (»detektivski« vohun). Med opazovanjem drugih lahko zbiraš informacije o njihovih geslih (npr. pri računalnikih), lahko jih opazuješ, ko delajo (npr. inženirji), se ljubijo (npr. politiki), ... Če si posebej izurjen (lahko se učiš sam ali s pomočjo posebnih inštruktorjev), lahko tudi vplivaš na druge (posamezni ali skupine ljudi) z močjo svojih veleslavnih in vsemogočih misli, da počnejo stvari, za katere želiš, da jih pač počnejo. Povzročiš lahko tudi umore (npr. vplivaš na drugega-o, da nekoga ubije, čeprav sam-a tega ne želi) ali celo vojne (npr. povzročiš lahko stanje vsesplošne zmede med ljudmi in/ali narodi). (Na žalost je precej težje ustaviti vojno, kot jo povzročiti. Morda je to razlog, da toliko ljudi rajši povzroča vojne kot »dela« mir. (Kdo bi se ukvarjal s poškodovanimi srci, telesi, domovi in ostalimi »oh-takodolgočasnimi «stvarmi? In za kaj?))

Vse to lahko delaš, tudi če nisi posebej plačan – zaradi lastnega veselja ali zato, ker si tako želiš, ali pa zato, da dokažeš, da »to zmoreš«.

Itd.

Seveda pa lahko na podoben način delaš tudi dobro. A to je že druga (precej neverjetna) zgodba...

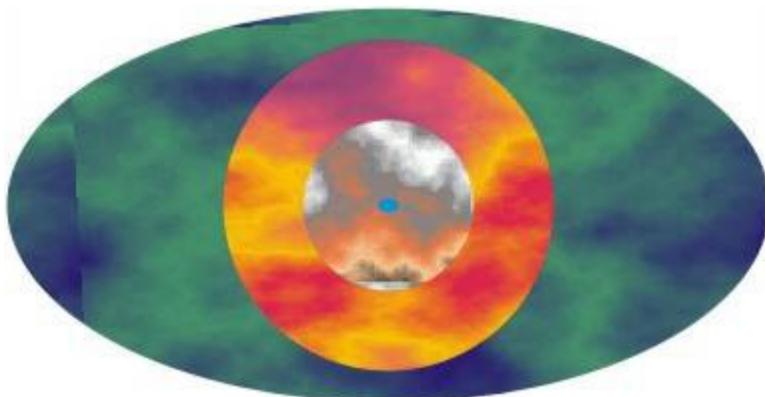

/

If you know how to »fly« (un-fortunately I don't master it) you can earn your money as a spy – you can work for governments (»political« spies, »cold war« or »psychological war« spies), for industry (»industrial« spies) or for »common« people (»detective« spies). While observing others you can collect data about their passwords (e.g. computers), you can observe others while working (e.g. engineers), have sex (e.g. politicians), ... If you are trained (by yourself or by special instructors), you can influence on others (individuals or groups of people) by the strength of your very famous and almighty brains, to do certain things you want them to do. You can also cause killings (e.g. You can make someone to kill somebody you want, although he-she doesn't want to kill by him-herself) or even wars (e.g. you can make a special feeling of general confusion among people and/or nations). (Very unfortunately it is more difficult to stop a war than to make it. Perhaps this is the reason so many people prefer to make wars than to make peace. (Who would take an interest in hurt hearts, bodies, homes and other »oh-so-boring« things? And what for?))

All these you can do although not paid – just for your own amusement or to meet your wishes or to prove that »you can do it«.

Etc.

In the similar way you can also do good. But this is a different (rather unbelievable) story...

The image is a collage of various elements arranged around a central hand-drawn calendar. The calendar is written in cursive and includes the months from January to December, along with some numbers and words in a foreign language (likely Slovene). It is surrounded by several small photographs of classical statues: Aphrodite with Cupido and a Dolphin, a head of Apollo, Venus (Aphrodite) kneeling, a full-length statue of Apollo, Aphrodite, and David. At the bottom left is a photo of two white parrots. In the center, there is a banner for "adopt a dolphin!" with the website www.blue-world.org. Below the banner is a video thumbnail showing a group of dolphins. At the bottom, there is a photo of a herd of horses running. The entire collage is set against a black background.

Asta) in knjige »starih«, ter si prizadevajte biti eno z naravo. »Kajti je tako kot piše.«

*P.S. Ali veste, da so orke križanci med znanostjo in new-age-om?

Če želite vedeti, kaj se dogaja na tem svetu, berite »Doktrina šoka-razmah uničevalnega kapitalizma« (Naomi Klein).

Če želite vedeti, kako vzgajati otroke, berite »Pika Nogavička« (A. Lindgren), »Mary Poppins« (P. L. Travers) in »Rada te imam, mama« ter »Očka, ti si nor« (obe W. Saroyan).

Če se želite učiti o ženskah in moških, berite »Strah pred letenjem« (E. Jong), »Ljubimec lady Chatterley« (D.H. Lawrence) in »Sex Matters« (Osho), »Tao ljubezni« (Mantak Chia).

Religija, spolnost in politika so privatne zadeve; tako ali drugače vsi živimo na enem planetu in se moramo medsebojno spoštovati - fanatizem je nasprotje dobrega okusa in pameti. »Edina stvar, ki je resnično ne prenesem, je fanatizem.«, je rekla fanatično.

Življenje je magija, magija je življenje; življenje brez ljubezni je životarjenje, počasno umiranje. Ljubezen je božanska. Prav tako vse, kar je z njo povezano. Seks (spolnost nasploh) je dar narave, ki nas ohranja psihično in fizično zdrave, nas ščiti pred stresom, vzdržuje igrivost in mladost na psihični in fizični ravni. Je tudi nekaj, kar nas povezuje z ostalim živim tako na Zemlji kot drugod. In je tudi nekaj, kar nas povezuje s svetom, od koder prihajajo otroci... In skrbi za prenos informacij in znanja vrste na psihični in fizični ravni.

»Dolžnost očetov je skrbeti, da so mame srečne (zadovoljne), saj če so srečne (zadovoljne) mame, smo srečni vsi. Dolžnost mam pa je, da so vesele in da s smehom in petjem ožarjajo naše domove.«

Ne delite zavesti in podzavesti, saj sta kot nedeljiva siamska dvojčka. Če ju boste poskušali ločiti, boste poškodovali živo snov.

Verjamem, da je edini resnični bog vesolje, ki je živo, ki se razteza ter krči v času in prostoru.

Zemlja je planet s svojimi značilnostmi in zakonitostmi, popolnoma enakovreden ostalim planetom itd. Enako Zemljani.

Edino resnično bistvo življenja je življenje samo; živi, diha, se spreminja ter giblje.

Vse je enakovredno in vse je različno.

Najboljši lutkar je tudi največja lutka.

Vsakdo ima pravico do samoobrambe.

Vsakdo je edinstven in vsakdo je zamenljiv.

Ne laži, ne goljufaj, ne prizadeni, ne zlorabljam, ne obrekuj, ne ponižuj.

Delaj, kar hočeš, in sprejmi posledice.

Nikoli ne dej češenj z Marie, ker ona ne mara češenj.

Izdaja je največji greh. Najogabnejša greha sta dajanje praznega upa in zloraba tistih, ki se ne morejo braniti.

Revolucija je del evolucije. Do revolucije pride, ko pozabimo, da so stalne spremembe sestavni del evolucije. Ce ni počasnih pravočasnih sprememb, pride do enkratne velike in boleče spremembe.

Revolucij ne prenašamo dobro, saj ne živimo dovolj dolgo.

Če zlorabljaš magijo, boš morda zmagal, a vladal boš s pomočjo svoje zlobe in bedastoče. Izgubil boš vse in uničil boš vsakogar. Ne delati tega. Prosim. Kajti magija je zelo močno orožje, orodje in tolažilo. Lahko je zelo dobra ali zelo slaba. Odvisno od uporabnika in njegovih/njenih misli – zavestnih in podzavestnih.

Resnica je resnica, je resnica, je resnica, je preprosto resnica. Kar je res, obstaja, pa če ti veš za to ali ne, če verjameš, da je resnično ali ne. (Eppur si muove. G. Galilei)

Nikoli ne stori nikomur, kar ne želiš, da bi drugi storil tebi. Stori drugemu le tisto, kar želiš, da bi drugi storil tebi. Najprej sodeluj z drugimi, nato delaj z njimi, kot oni delajo s teboj (če lahko, seveda...).

Znanje in Zemlja ter vesolje pripadajo vsem.

»In gledali boste svojih sanj in držav propad. Tudi jaz sem morala gledati to, zakaj ne bi tudi vi? Kdo, hudiča, pa mislite, da ste?« Marie

Ne vprašaj, kaj naj država stori zate, vprašaj, kaj lahko ti storiš za državo. (John F. Kennedy)

In če bomo tisti, ki se nam dobro godi, pozabili na tiste, ki se jim slabo godi, se bo nekoč vse skupaj slabo končalo. (E. Kastner, »Pikica in Tonček«)

... ne sprašuj se, komu zvoni; zvoni tebi. (J. Donne; iz knjige E. Hemingwaya »Komu zvoni«) Misli globalno, deluj lokalno. (?)

Ne boj se in ne sovraži. (R. Tagore)

Vljudnost je mati modrosti. (slovenski pregovor)

Za vsako rit' se pal'ca najde. (slovenski pregovor)

In kako neumni so odrasli! Odrasli so neumni tako zelo, da povedati to je res težko. (S. Makarovič)

IF YOU WANT TO LEARN ABOUT MAGIC, READ, E.G.:

>>Harry Potter<< (J. K. Rowling), >>Lord of the rings<<* (J. R. R. Tolkien), >>The Demon-Haunted World: Science as a candle in the dark<< (C. Sagan), >>Holy blood, holy grail<<, >>The Messianic Legacy<< (M. Baigent, R. Leigh, H. Lincoln), >>Fingerprints of the Gods<< (G. Hancock), >>The Gaia Project<< (H.—Y. Jang), >>The Field<< (L. Asta: the Slovenian book probably hasn't been translated to English yet), and books of the >>oldones<<, and try to be one with nature. »Because it is as it was written.« *P.S.

Do you know that orcs are hybrids between science and new-age?

If you want to know what is going on in this world, read >>The Shock Doctrine-The Rise of Disaster Capitalism<< (Naomi Klein).

If you want to know how to bring up children, read >>Pippi Longstockings<< (A. Lindgren), >>Mary Poppins<< (P. L. Travers), and >>Mama I love you<<, >>Papa you're crazy<< (both W. Saroyan).

If you want to learn about women and men, read >>Fear of Flying<< (E. Jong), >>Lady Chatterley's Lover<< (D. H. Lawrence) and >>Sex Matters<< (Osho), >>Healing Love through the Tao<< (Mantak Chia).

Religion, sexuality and politics are private affairs; somehow we all live on one planet and we have to respect each other - fanaticism is an opposition to good taste and intellect. <<The only thing I really can't stand is fanaticism.<<, she said fanatically.

Life is magic, magic is life; life without love is vegetating, slow dying. Love is divine. And everything connected with it, is divine, too. Sex (sexuality generally) is a gift of nature, it preserves our psychical and physical health, protects against stress, maintains capability to play and youthfulness at psychical and physical levels. It also connects us with other life on Earth and elsewhere. And it connects us with the world, from which children come... And it transmits information and knowledge of one species at psychical and physical levels.

>>Fathers have to take care about mammas' happiness (satisfaction), because if mammas are happy (satisfied), we are all happy. Mothers have to be happy and shine on our homes with their laughter and singing.<<

Don't split consciousness and subconsciousness, they are like non-separable twins. If you try to split them, you will hurt a living form.

I believe that the only real god is space, which is alive and spreads and reduces in time and place.

Earth is a planet with its own characteristics and lawfulness, completely equal to other planets, etc. Equally its inhabitants.

The only real meaning of life is life itself; it lives, breathes, changes and moves.

Everything is equal and everything is different.

The greatest marionette operator is also the greatest marionette.

Everyone has a right to self- defence.

Everyone is unique and everyone is replaceable.

Don't lie, don't cheat, don't hurt, don't abuse, don't slander, don't humiliate.

Do what you want, and accept consequences.

Never eat cherries with Marie, because she doesn't like cherries.

Treason is the biggest sin. The most disgusting sins are giving vain hopes and abuse of those who can't defend themselves.

Revolution is a part of evolution. We get revolution, when we forget that constant changes are inevitable part of evolution. Without slow punctual changes we get one single and painful change.

We don't stand revolutions very well – we don't live long enough.

If you misuse magic(s), you will perhaps win, but you will reign with your own malice and imbecility. You will lose everything and you will destroy everyone. Don't do this. Please. Because magic(s) is a extremely strong weapon, tool and consolation. It can be very good or very bad. It depends on the user and his/her thoughts –conscious and subconscious.

The truth is the truth, is the truth, is the truth, is simply the truth. What is the truth, really exists, whether you know it or not, whether you believe it is real or not. (Eppur si muove. G. Galilei)

Never do to others what you would not have them do to you. Do to others only what you would have them do to you. Cooperate with others first, then do to them as they do to you (if you can, of course...).

Knowledge and Earth and Universe belong to everyone.

»And you will be watching a destruction of your dreams and your lands. I also had to watch it, why shouldn't you, too? Who the hell you think you are?«Marie

Don't ask what your country can do for you, ask what you can do for your country. (John F. Kennedy)

And if we, who live high lifes, forget about those who live low lifes, one day everything will finish pretty bad. (E. Kastner, »Anna Luise and Anton«)

... don't ask for whom the bell tolls; it tolls for thee. (J. Donne; from E. Hemingway's »For Whom the Bell Tolls«)

BALONEY DETECTION KIT:

(Vir / Source: <http://users.tpg.com.au/users/tps-seti/baloney.html>. 7. 9. 2013)

Warning signs that suggest deception. Based on the book by Carl Sagan "The Demon Haunted World".

The following are suggested as tools for testing arguments and detecting fallacious or fraudulent arguments:

- Wherever possible there must be independent confirmation of the facts.
- Encourage substantive debate on the evidence by knowledgeable proponents of all points of view.
- Arguments from authority carry little weight (in science there are no "authorities").
- Spin more than one hypothesis - don't simply run with the first idea that caught your fancy.
- Try not to get overly attached to a hypothesis just because it's yours.
- Quantify, wherever possible.
- If there is a chain of argument every link in the chain must work.
- Occam's razor - if there are two hypotheses that explain the data equally well choose the simpler.
- Ask whether the hypothesis can, at least in principle, be falsified (shown to be false by some unambiguous test). In other words, it is testable? Can others duplicate the experiment and get the same result?

Additional issues are:

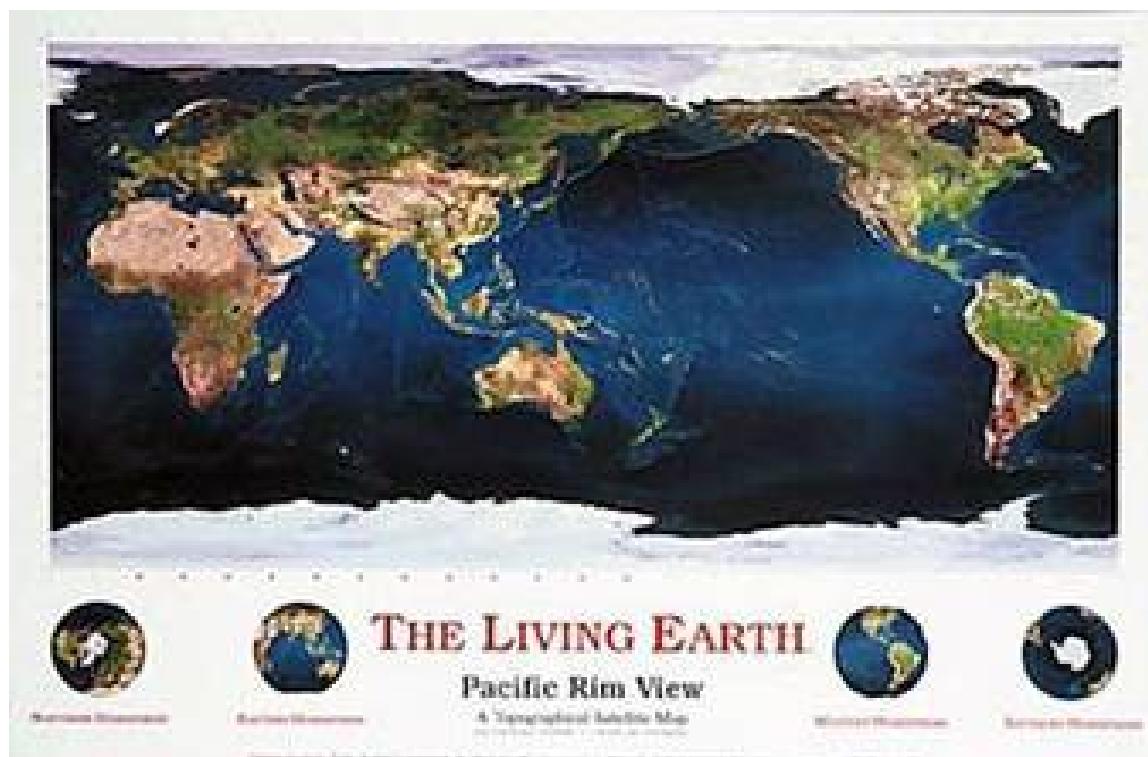

- Conduct control experiments - especially "double blind" experiments where the person taking measurements is not aware of the test and control subjects.
- Check for confounding factors - separate the variables.

Common fallacies of logic and rhetoric:

- Ad hominem - attacking the arguer and not the argument.
- Argument from "authority".
- Argument from adverse consequences (putting pressure on the decision maker by pointing out dire consequences of an "unfavorable" decision).
- Appeal to ignorance (absence of evidence is not evidence of absence).
- Special pleading (typically referring to god's will).
- Begging the question (assuming an answer in the way the question is phrased).
- Observational selection (counting the hits and forgetting the misses).
- Statistics of small numbers (such as drawing conclusions from inadequate sample sizes).
- Misunderstanding the nature of statistics (President Eisenhower expressing astonishment and alarm on discovering that fully half of all Americans have below average intelligence!)
- Inconsistency (e.g. military expenditures based on worst case scenarios but scientific projections on environmental dangers thriftily ignored because they are not "proved").
- Non sequitur - "it does not follow" - the logic falls down.
- Post hoc, ergo propter hoc - "it happened after so it was caused by" - confusion of cause and effect.
- Meaningless question ("what happens when an irresistible force meets an immovable object?).
- Excluded middle - considering only the two extremes in a range of possibilities (making the "other side" look worse than it really is).
- Short-term v. long-term - a subset of excluded middle ("why pursue fundamental science when we have so huge a budget deficit?").

- Slippery slope - a subset of excluded middle - unwarranted extrapolation of the effects (give an inch and they will take a mile).
- Confusion of correlation and causation.
- Caricaturing (or stereotyping) a position to make it easier to attack.
- Suppressed evidence or half-truths.
- Weasel words - for example, use of euphemisms for war such as "police action" to get around limitations on Presidential powers. "An important art of politicians is to find new names for institutions which under old names have become odious to the public".

17 TO SEM JAZ / IT IS I

Copyright Dušanka Mravlja. September 2013.

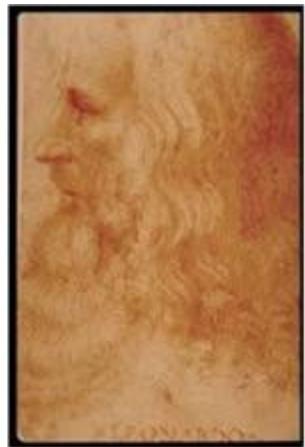

Rojena sem bila leta 1963; od rojstva živim v Ljubljani, kjer tudi delam. Z numerologijo se ukvarjam že zelo dolgo – na svoj način, seveda. Rada imam naravo, živali, gozd, morje, sonce, vse zvrsti dobre glasbe, znanstveno fantastiko, komedijo, Skandinavijo, Italijo in Južno Dalmacijo, zgodovino, dobro hrano in rdeče vino. Obožujem, ko imam občutek, da sem eno z naravo – ko sem istočasno velika in majhna. Nisem religiozna v klasičnem smislu; najbližje sem panteističnemu konceptu religije. Ne prenesem laži, prevar, mučenja, nepravičnosti, vojn, bolečine, lakote, revščine, neumnosti, bahanja, sebičnosti, ozkosrčnosti, in če mi kdo brska po možganih. Sem samska in na žalost nimam otrok, prav tako nimam vozniškega izpita. Imam pa kolo, psa in nekaj rib ter vodnih polžev. Kadim cigarete (še vedno...), pijem kavo in črni čaj. Sem 1,68 m visoka, težka ? kg, imam rdečkaste lase, zelenkaste oči in sončne pege; lahko si predstavljate, da podobnaresnični čaravnici - ampak resni in dobrosrčni...

/

I was born in 1963; from the beginning I live in Ljubljana, Slovenia, where I also work. I take an interest in numerology for a very long time – in my own way, of course. I like nature, animals, forest, sea, sun, all kinds of good music, science fiction, comedy, Scandinavia, Italy and Southern Dalmatia, history, good food and red wine. I adore to be one with nature – when I am big and small at the same time. I am not religious in a classical sense; a pantheistic concept of religion is the closest to me. I can't stand lies, deceptions, torture, injustice, wars, pains, hunger, poverty, stupidity, boasting, selfishness, narrow-mindedness, and if one scratches me all over my brains. I am single and unfortunately don't have children, and I also don't have a driving licence. But I have a bicycle, a dog and some fish and water-snails. I smoke cigarettes (still...), drink coffee and black tea. I am 168 cm tall, my weight is ? kg, I am red-haired, have greenish eyes and sunspots; you can imagine I look like a real witch – but a serious and a goodhearted one...
