Notes by Dušanka Mravlja 28/07/2016:

- Treatment is easier if you write the corresponding numerical code-s on the ill part of the body – it doesn't matter if it is washed away in a few seconds, etc. The written code remains in the aura, and you can also re-write it, if you wish :-).
- If you can't remember a numerical code, you can remember at least a code "11981" and/or a word "Norm" - let the Norm is in compliance with the Creator's will/norm.
- If you write on a piece of paper, use white A4 paper.

1) Grigori GRABOVOI - CODES AND METHODS FOR SUCCESSFUL BUSINESS

Source: <http://www.vecnamladost1489999slovenija.com/posel/> (28/07/2016); translated by Dusanka Mravlja

In business, it is important to immediately decide for eternal life and eternal development.

The Creator never dies, and he determined the same status to his/her children – to us.

It is important to distinguish between the human with a soul, who is a creation of God, and others, who walk among us and who have no soul / there is more written about this in the Bible 1, 2 and 3 of Igor Arepejeva /.

You will recognize them by their actions and procedures, by the fact that they don't take care about the others, by their egocentrism and greed.

With such people it is not good to work nor to enter into any transaction.

The reasons are many. Their world is falling down, so be careful that they don't drag you with them.

There are 3 levels of existence:

1. the material - the lowest rate;
2. energy;
3. information - the highest rate / now it is important that everyone works through these levels, the results are 100% - it is worth to learn and receive the knowledge directly from the Creator – the knowledge is directly forwarded to you /

This page is about the business, so we'll explain exactly this area of life.

According to Grabovoi it is important to stress the enabling of the eternal life, which enables such business activities which enables a successful business. It is important to always work for the salvation of everyone and everything, and for a harmonious development of all. This is the basis of learning of GG for the existence here and now.

Every business has a lot of goals. A basis for each target is a perpetual development – in both, written documents and plans for: production, marketing, organization, risk management, evaluation, financial management, ...

Each business plan which you design has to contain in itself eternal development and activities for the good of us all, the use of safe technologies that will be developed with the help of the Creator, and which will make the development of the entire planet under the Creator's norm is possible.

The new business areas will become appear and develop, which will be in accordance with the new standards established - the eternal development.

The system of competition will be eliminated.

New partnerships will be developed, established - among us, who will work for the welfare of every human being, with help of safe, non-hazardous technologies, and technologies which don't pollute the environment.

According to this method has been forecasted – for these who wishes so – a growth of small business to large international business, and this objective should be included in their business plans.

When you do this, it means that you are serious and that you're not kidding.

Eternal development business has in itself a basis for eternal life of a human.

After all, today we are informed by a large number of scientists that death doesn't exist.

Grabovoi, Petrov and Arepejev are telling this to us for 20 years, they regenerate human organs, heal people who ahave serious illnesses, revive the dead, prevent possible global catastrophes by the power of their thoughts, ...

During all the activities the human is obliged to act in the way towards the eternal life and eternal development of a company. Measures are receiving skills and use them in all areas of life, and spread teachings on and on and on.

Finally the time has come that we can work without stress, and being guided by Almighty Father. All intermediaries between the Creator and human beings are eliminated: the death, various organizations, anxieties and fear.

There are only two emotions: fear and love.

If you are afraid - you are not in love.

If you are in love - you are not afraid!

The choice is yours.

Begin with what is available to you in your overcrowded working day:

1. a code for a direct contact with the Creator - 11981 and 123707 44 / and 123 111 50 25 /
2. a code for changing from negative to positive, and to obtain serenity and peace 1888948; repeat „10 to minus 17“, if you are under stress or in a torrent of negative actions
3. write codes on your desk, on the documents, in the diaries, on computers
4. start practicing "Methods of Concentrations" of Grigori Grabovoi - you will have a huge development
5. read books of all three authors
6. completely indulge to the Creator's management and for a short time you will enjoy – you will work only with people who are similar to you, which are located on the same path of eternal life and eternal development / you will work a lot, but you'll be delighted as never before /. Always give priority to the protection of guaranteed eternal life of business participants and all others as well as your every project
7. educate people at every step; awareness is rising with incredible speed and everyone want new skills which lead to eternal life, health and joy, the beauty of existence
8. be thankful to the flying bird , to the flower, to the human who laughs – the Creator has sent them to your life to bring you joy, to put a smile on your face, make you happy
9. always write in the plan of financial resources a statement that you work for eternal life and eternal development - for the good of every human being, to always have money and that this new business will be quickly expanded
10. accurately determine your business scheme to such a degree that all the elements will produce the most effective security of eternal life for all.

BUSINESS MANAGEMENT THROUGH CODES:

419 819 719 81 - development of small enterprises to medium and large by using the methods of eternal life and development
